EXAMINER

BELL, CORY C

ART UNIT

PAPER NUMBER

2164

DATE MAILED: 04/18/2006

Please find below and/or attached an Office communication concerning this application or proceeding.

Office Action Summary	Application No. 10/712,836	Applicant(s) GORDON, MARK R.	
	Examiner Cory C. Bell	Art Unit 2164	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☐ Responsive to communication(s) filed on ____.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

- 4) ☒ Claim(s) 1-26 is/are pending in the application.
- 4a) Of the above claim(s) ____ is/are withdrawn from consideration.
- 5) ☐ Claim(s) ____ is/are allowed.
- 6) ☒ Claim(s) 1-26 is/are rejected.
- 7) ☐ Claim(s) ____ is/are objected to.
- 8) ☐ Claim(s) ____ are subject to restriction and/or election requirement.

Application Papers

- 9) ☐ The specification is objected to by the Examiner.
- 10) ☐ The drawing(s) filed on ____ is/are: a) ☐ accepted or b) ☐ objected to by the Examiner.
Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).
Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).
- 11) ☐ The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.

Priority under 35 U.S.C. § 119

- 12) ☐ Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).
- a) ☐ All b) ☐ Some * c) ☐ None of:
1. ☐ Certified copies of the priority documents have been received.
 2. ☐ Certified copies of the priority documents have been received in Application No. ____.
 3. ☐ Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).

* See the attached detailed Office action for a list of the certified copies not received.

DETAILED ACTION

1. Claims 1-26 have been examined.

Claim Rejections - 35 USC § 112

2. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

3. **Claims 3, 5, 7, 8, 12, 16, 19, and 24** are rejected under 35 USC 112 2nd paragraph as they recited a singular summary table whose relationship to the plurality of summary tables in the independent claims is unclear.
4. **Claim 25** is rejected under 35 USC 112 2nd paragraph as the relationship of “a summary table” to the prior recitations of a single summary table in the claim upon which it depends is unclear.

Claim Rejections - 35 USC § 101

5. 35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

Claims 1-26 are rejected under 35 U.S.C. 101 because the claimed invention lacks patentable utility. The mere calculation of a performance measure is not useful, as information is not displayed to user or used to provide any function.

Claim Rejections - 35 USC § 103

Art Unit: 2164

6. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

7. Claims 1-26 are rejected under 35 U.S.C. 103(a) as being unpatentable over US 6,385,604, known hereafter as Bakalash, or the admitted prior art in view of US 6,678,676 known hereafter as Brickell.

8. **Claims 1 and 10** are rejected for the following reasons:

Bakalash teaches summery tables for use in an OLAP database system in col 6, as does applicants admitted prior art in paragraphs 2-4 of the instant application. However, neither disclose proposing summary tables and calculating performance measures, but these features are taught in Brickel. Col 3 lines 16-37 teaches calculating an estimate the query execution time witch is a performance measure based on inputted queries, and a query analysis system generating the selected summaries, based on the data from the database i.e. the estimated query processing time calculated based on the inputted queries. Thus, it would have been obvious to one of ordinary skill in the art at the time of the art to include the features of Brickel in Bakalash as it provides an automatic process that does not require substantial input from the system user or system administrator for maintaining summery tables(Brickel col 3 line 59 – col 4 line 4).

9. **Claims 2, 11, and 20** are rejected for the following reasons:

Bakalash and The admitted prior art as modified teaches the claims upon which these claims are dependant, however they fail to expressly disclose the set of summery tables being determined based on characteristics utilized in the summary table. However, this is taught in Brickel col 6

Art Unit: 2164

line 16-46. Thus, it would have been obvious to one of ordinary skill in the art at the time of the art to include the features of Brickel in Bakalash as it provides an automatic process that does not require substantial input from the system user or system administrator for maintaining summery tables(Brickel col 3 lines 59 – col 4 line 4).

10. **Claims 3, 12, and 21** are rejected for the following reasons:

Bakalash and The admitted prior art as modified teaches the claims upon which these claims are dependant, however they fail to expressly disclose the performance measure comprising an estimated amount of time saved for using the summary table. However, this is taught in Brickel col 3 line 21-24. Thus, it would have been obvious to one of ordinary skill in the art at the time of the art to include the features of Brickel in Bakalash as it provides an automatic process that does not require substantial input from the system user or system administrator for maintaining summery tables(Brickel col 3 line 59 – col 4 line 4).

11. **Claims 4, 13, and 22** are rejected for the following reasons:

Bakalash and The admitted prior art as modified teaches the claims upon which these claims are dependant, however they fail to expressly disclose the performance measure based on an estimated amount of time saved and summary table size. However, this is taught in Brickel col 3 lines 16-24. Thus, it would have been obvious to one of ordinary skill in the art at the time of the art to include the features of Brickel in Bakalash as it provides an automatic process that does not require substantial input from the system user or system administrator for maintaining summery tables(Brickel col 3 line 59 – col 4 line 4).

12. **Claims 5, 14, and 19** are rejected for the following reasons:

Art Unit: 2164

Bakalash and The admitted prior art as modified teaches the claims upon which claims 5 and 14 are dependant, as well as the limitations of claim 19 except they fail to expressly disclose the performance measure based on performance data of characteristics relating to the summary table and performance data for any subsets of characteristics relating to the summery table. However, this is taught in Brickel col 8 lines 35-44 shows a performance measure based on the number of rows reduced to over the number of rows for the table/tables being represented, and the number of rows is performance data as it is analogous to how long it takes to parse a table. Thus, it would have been obvious to one of ordinary skill in the art at the time of the art to include the features of Brickel in Bakalash as it provides an automatic process that does not require substantial input from the system user or system administrator for maintaining summery tables(Brickel col 3 line 59 – col 4 line 4).

13. **Claims 6, 15, and 23** are rejected for the following reasons:

Bakalash and The admitted prior art as modified teaches the claims upon which these claims are dependant, however they fail to expressly disclose the performance measure being normalized for summary tables based on different fact tables. However, this is taught in Brickel col 8 lines 35-44 shows a performance measure based on the number of rows reduced to over the number of rows for the table/tables being represented, and the number of rows is performance data as it is analogous to how long it takes to parse a table, this is a normalized figure and summary tables are based on different tables. Thus, it would have been obvious to one of ordinary skill in the art at the time of the art to include the features of Brickel in Bakalash as it provides an automatic process that does not require substantial input from the system user or system administrator for maintaining summery tables(Brickel col 3 line 59 – col 4 line 4).

Art Unit: 2164

14. **Claims 7, 16, and 24** are rejected for the following reasons:

Bakalash and The admitted prior art as modified teaches the claims upon which these claims are dependant, however they fail to expressly disclose a performance analysis system the determines an actual performance analysis system that determines an actual performance value of a given summary table using feedback from the database system. However, this is taught in Brickel col 2 line 62- col 3 line 15. Thus, it would have been obvious to one of ordinary skill in the art at the time of the art to include the features of Brickel in Bakalash as it provides an automatic process that does not require substantial input from the system user or system administrator for maintaining summery tables(Brickel col 3 line 59 – col 4 line 4).

15. **Claims 8, 17, and 25** are rejected for the following reasons:

Bakalash and The admitted prior art as modified teaches the claims upon which these claims are dependant, however they fail to expressly disclose a comparing statistics fro queries using identical characteristics that are preformed before and after creation of the summery table. However, this is taught in Brickel col 2 line 62- col 3 line 15, which compares the same query performed with and without the summary table present. Thus, it would have been obvious to one of ordinary skill in the art at the time of the art to include the features of Brickel in Bakalash as it provides an automatic process that does not require substantial input from the system user or system administrator for maintaining summery tables(Brickel col 3 line 59 – col 4 line 4).

16. **Claims 9, 18, and 26** are rejected for the following reasons:

Bakalash and The admitted prior art as modified teaches the claims upon which these claims are dependant, however they fail to expressly disclose deleting low performing summary tables.

However, this is taught in Brickel col 4 lines 5-10 or Col 7 lines 5-10. Thus, it would have been

Art Unit: 2164

obvious to one of ordinary skill in the art at the time of the art to include the features of Brickel in Bakalash as it provides an automatic process that does not require substantial input from the system user or system administrator for maintaining summery tables(Brickel col 3 line 59 – col 4 line 4).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Cory C. Bell whose telephone number is (571) 272 2736. The examiner can normally be reached on m-f 8:30-5:00.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Charles Rones can be reached on (571) 272 4085. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see <http://pair-direct.uspto.gov>. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
